EDUCATION

University of Illinois Urbana-Champaign, Gies College of Business Champaign, IL
M.S. in Business Analytics (STEM) — GPA: 3.9 *Sep 2025 to Dec 2026*
– Relevant Coursework: Intro to Data Analytics Apps, Enterprise Database Management, Business Practicum. Expected Fall 2026: Investment Banking, Advanced Data Science & Python for Finance.

New York University, Tandon School of Engineering Brooklyn, NY
B.S. in Business and Technology Management (Finance) — GPA: 3.3 *May 2021 to May 2025*
– Honors & Awards: Dean's List (2022 to 2025), Amazon Hackathon Winner, TEDxNYU Speaker.

EXPERIENCE

Illinois Business Consulting — Rotational & Mentorship Program (RAMP) Urbana-Champaign, IL
Student Consultant (Part-Time) *Sep 2026 to Present*
– Selected through a competitive, multi-round case-based process for UIUC's student consulting organization; completed bootcamp training in MECE problem structuring, market sizing, and financial modeling.
– Serve on a cross-functional consulting team conducting quantitative analysis, secondary market research, and competitive benchmarking to deliver market-entry, growth-strategy, and operational-optimization recommendations for mid-market and enterprise clients.

Busey Bank, Treasury & ALM – ACL and Liquidity Risk Champaign, IL
Finance Intern *July 2026 to September 2026*
– Built a deposit classification model separating internal product-shift cannibalization from true external growth across $1B+ in transfers, sharpening Treasury's read on net deposit growth and its impact on funding costs and net interest margin.
– Improved transaction classification reliability underlying liquidity and segmentation reporting for a 300K+ account portfolio, cutting manual review needed each month.
– Validated the model to $0 variance across all five deposit product categories, establishing it as a recurring input to the team's liquidity forecasting.
– Researched the GENIUS Act and upcoming stablecoin regulation and presented a proposal to management on how Busey could leverage stablecoins to support deposit growth.

WOW Payments NJ/NY
Fintech Marketing Intern *May 2024 to Aug 2024*
– Conducted 100+ field sales conversations pitching payment solutions to small business owners; grounded campaign data with direct customer feedback, identifying pricing confusion as the primary cause of conversion drop-offs.

Tandon Consulting Club Brooklyn, NY
Vice President *Aug 2024 to May 2025*
– Scaled organizational membership from 150 to 450 students (200% growth) by establishing partnerships with McKinsey and Deloitte.
– Organized 4 industry panels and facilitated weekly development workshops to coach 30+ peers in analytical problem-solving.

PROJECTS

Supply Chain Network Optimization – MSBA Capstone with Dot Foods Spring 2026
Project Lead
– Led a 6-person team using Python simulations to test whether pallet density – the industry default – actually minimized cost; found pre-sorted, less-dense loads cut driver labor enough to project $3.05M in net annual savings.

Algorithmic Trading & Prediction-Market Platform (algo-trade-hub-prod) Spring 2026
Quantitative Trading and ML Ops
– Built a production quantitative trading monorepo identifying arbitrage edges across prediction markets (Kalshi) using weather, macro (FRED), and crypto data (Python/Supabase, React/Vite, LightGBM); used Optuna to tune a Bitcoin/Ethereum direction model against live order-book data, reaching a 3.08x portfolio profit factor and a 75.5% win rate across 49 trades.

Synchrony Guardrail Engine (Synchrony Datathon) March 2026
Workforce Management Forecasting & Hybrid AI
– Developed a workforce management forecasting engine utilizing Prophet and XGBoost ensembles, optimized via Optuna on AWS SageMaker with MLflow tracking; pivoted the model into a business case prioritizing asymmetric risk management and long-term scalability.

TECHNICAL SKILLS & CERTIFICATIONS

– ML Ops & Cloud: AWS SageMaker, Supabase, Hugging Face, MLflow, Optuna, GitHub Actions (CI/CD), RAG Architectures.
– Programming & Data: Python (pandas, Scikit-learn, LightGBM, Prophet), R, SQL, DAX, Power Query (M).
– Consulting & Strategy: Case-Based Problem Solving, MECE Frameworks, Market Sizing, Deposit & Liquidity Analysis, Celonis Process Mining, Enterprise Risk Management, Business Process Modeling, Supply Chain Logistics.
– Analytics & BI: Excel (Power Pivot, Financial Modeling, VBA, Solver), Power BI, Tableau, KNIME.

Certifications: Celonis Certified, Microsoft Business Analysis Fundamentals, Google Data Analytics, Bloomberg Market Concepts.
